Important Notes

All current safety regulations and guidelines must be observed in those countries where our products are used.

The photos shown in this brochure feature construction sites in progress. For this reason, safety and anchor details in particular cannot always be considered as conclusive or final. These are subject to the risk assessment carried out by the contractor.

In addition, computer graphics are used which are to be understood as system representations. For ensuring a better understanding, these and the detailed illustrations shown have been partially reduced to certain aspects. The safety installations which have possibly not been shown in these detailed descriptions must nevertheless be available.

The systems or items shown might not be available in every country.

Safety instructions and load specifications are to be strictly observed at all times. Separate structural calculations are required in case of changes and deviations.

The information contained herein is subject to technical changes in the interests of progress. Errors and typographical mistakes reserved.

- 34 Water-retaining structures
- 38 Single-sided walls

- 40 Components

General

The variable girder wall formwork system

VARIO GT 24 is the proven girder wall formwork system complete with the continuously adjustable elongated hole couplings.

Regardless whether it is industrial or residential construction, bridge abutments or retaining walls, every layout and any height up to 18 m can be formed with PERI VARIO.

The 30 cm increments of the GT 24 girder allow easy adjustment to suit the required height.

Pre-assembled, ready-to-use platforms provide site personnel with a very high level of safety, as well as large time savings particularly with multiple usage.

Extended VARIO GT 24 panels being used to shutter administration building.

VARIO GT 24 being used to build a sewage treatment facility with tapered walls.

The VARIO GT 24 girder wall formwork system offers many advantages. This includes simple planning, minimum on-site material requirements and fast, efficient formwork sequencing.

Optimally-sized large elements can be assembled specifically for every project. In the process, the following points can always be freely selected:

- type and size of the formlining
- formlining fixings
- panel widths and heights
- position of any height extension or reduction
- girder length and spacing
- waler position, profile and length
- permissible fresh concrete pressure
- tie arrangement (horizontal, vertical)
- type of panel (straight, curved, offset)

General

The variable girder wall formwork system

The formwork is extended with the VARIO Extension Splice 24.

Quickly and easily fitted through the latticework of the GT 24, without having to drill girders.

The flexural rigid connection automatically aligns the girders. The splice consists of just two components which are quickly connected using triple wingnuts.

VARIO GT 24 formwork specially adapted to the requirements with defined formlining joint formation and tie point positioning.

VARIO GT 24 on the RCS rail climbing system for constructing the elevator and stairway shafts of a highrise building.

VARIO panels, with concreting scaffold and push-pull props, are shifted as a complete unit.

Soundproof sealing of the tie points costs 50% less as the top tie point is above the concrete with water spacing of 2.37 m.

General

Complicated geometries with standard system components

14 m high VARIO elements were arranged polygonally in the curved areas. With large-sized Fin-Ply Maxi plywood as formlining, an excellent concrete surface quality could be achieved.

VARIO GT 24 being used to construct a circular tank. Timber wedges between girders and steel walers produce the circular shape.

Even for this complicated layout, over 90% of the formwork consists of standard system components.

Multi-storey building in Paris with VARIO GT 24 and CB 240 climbing formwork systems.

The stringent French safety standards for high-rise construction were taken into account during the formwork planning. They included fine wire mesh panels for all safety handrails, and end handrail swing frames for the outside climbing units, in order to maximise the protection against falling, even during climbing.

General

The GT 24 lattice girder

As the main component in slab and wall formwork, the formwork girder significantly determines the profitability of the formwork. Thereby, it is not the initial investment costs but the durability and handling costs which are the decisive factors.

The GT 24 from PERI offers:

- long service life
- shorter forming times

Therefore, successful contractors use the GT 24 lattice girder from PERI:

- light and manageable for slabs
- strong for wall formwork
- cost-effective for customized formwork solutions

More information is available in the GT 24 brochure.

Designed by timber specialists to ensure a long service life

The patented girder nodes with mini-finger joints has virtually no “water cavities” which could trap moisture. The latticework design ensures excellent air circulation even when the girders are stacked.

The GT 24 in comparison	VT 20	GT 24	Diff. %
Permissible reaction force	22 kN	28 kN*	+ 27%
Permissible bending moment	5 kNm	7 kNm*	+ 40%
Flexural stiffness	460 kNm ²	887 kNm ²	+ 86%
Weight	5.9 kg/m	5.9 kg/m	±0%

* When supported at the nodes.

High load-bearing capacity with low weight

Perm. Q on the
compression struts $Q_D = 14 \text{ kN}$
Perm. bending moment $M = 7 \text{ kNm}$
 $I_y = 8.064 \text{ cm}^4$

Steel end caps with through-rivets

- Robust end protection
- Prevents end being sawn off accidentally
- Can be used to replace the rubbing board on VARIO panels if required

6 x 8 cm thick chord

For easy screwing and nailing. The girder chord is prevented from splitting as the full depth of the chord is finger-jointed to the struts and tied at each girder connection.

PERI Design Tables are available for slab and wall formwork operations. The girder is monitored according to the requirements of DIN EN 13377.

The GT 24 lattice girder –
the girder that reduces
your shuttering costs!

General

The standard system components of a VARIO GT 24 panel

The GT 24 formwork girder

forms the main element of the VARIO GT 24 wall formwork. Available in lengths from 90 cm to 17.80 m, in 30 cm increments.

Cross-section

Steel Waler SRZ / SRU

Available in standard lengths as well as any special sizes and forms. Profile cross-sections of the U 100 to U 140 and others.

VARIO Steel Waler and Internal Corner Waler IRZ for corner panels.

Formlining

PERI formlining sheets come in a range of sizes, thicknesses and grades to ensure that the most appropriate formlining is available to meet individual site requirements.

Connecting components

Hook Strap HB 24

for connecting the GT 24 to SRZ and SRU walers on the girder nodes.

Hook Strap Uni HBU

for connecting the GT 24 to SRZ and SRU walers outside of the girder nodes.

TSS Torx Screw

for assembling the formlining.

Standard Applications

VARIO GT 24 standard panels

VARIO standard panels are pre-assembled rentable formwork panels which are fitted with 21 mm formlining.

The ready-to-use wall formwork is assembled using tried and tested VARIO system components. The panels are supplied complete with lifting eyes and rubbing board.

Permissible fresh concrete pressure:
 60 kN/m² with tie spacings 55/140/55
 or 50 kN/m² with tie spacings 62.5/125/62.5 according to DIN 18202, Table 3, Line 7.

Integrated crane lifting unit as well as top cover board for protecting against concrete splashes.

VARIO GT 24 standard elements complete with platforms.

Height increments

VARIO standard panels are available in 60 cm height increments. These panels are simply extended for greater heights.

VARIO standard panels for 9 m high tunnel walls.

Width increments

VARIO standard panels are available in 4 widths:

VARIO standard internal corners

The consistent leg length of 75 cm allows this design to be used as a left-hand or right-hand corner.

The VARIO standard internal corner is available in 5 heights: 2.40, 3.00, 3.60, 4.80 and 6.00 m.

Standard Applications

Continuously adjustable panel connections

The rows of slots in the PERI steel walers and couplings allow continuous tightening of panel joints of even roughly erected panels.

VARIO Coupling VK

With the VARIO coupling, the panels are simultaneously aligned.

The multi-functional VARIO coupling with the wedge:

- continuously tightens until joint is grout-tight
- aligns panels
- supports plywood fillers
- extends the width of panels
- fixes stopend formwork
- stabilises internal corners
- is continuously adjustable on both sides

Important:

PERI steel walers and couplings have notches in the elongated holes. These must always point towards the concrete side. As a result, the tolerances are equal to zero and the panel joints are optimally aligned.

Standard joint

The continuous adjustment possibility ensures extremely tight panel joints.

Filler joint

Any gap up to 1.25 m wide can be filled.

Internal corner

The same VARIO coupling as for the straight joint.

Oblique joint

Any angle can be shuttered with the articulated coupling.

Practical tip

Whether a wedge is locking or pulling is evident from its inclination:

Wedge tip points to the element joint

= wedge pulls

Wedge tip points away from the element joint

= wedge pushes

wedge locking

wedge pulling

Neat and precise panel joints are always specifically required where special architectural requirements are placed on the concrete surface.

VARIO Coupling Concrete Finish VKS

With the VARIO Coupling VKS and the Alignment Clamp VRS, it is easy and quick to carry out.

The Coupling VKS allows offsets up to 5 mm to be compensated. At the same time, the Coupling VKS can be used as a "standard panel connection".

Handling

- Centrally position the Coupling VKS on the element joint in the steel wall.
- The smaller side of the trapezoidal-shaped cut-outs points to the concreted side. (Fig. 1)

Fig. 1

- Position the Wedge KZ in the same way as with coupling VKZ.
- With element offsets, mount Alignment Clamp VRS on Panel 1 positioned to the rear.
- Release pulling wedge on Panel 2.
- Use counter wedge to slightly open the formlining joint on Panel 2. (Fig. 2)

Fig. 2

- Loosen pulling and counter wedges on Panel 1.
- Eliminate panel offset by tensioning the Alignment Clamp VRS.
- Release pulling wedge on Panel 2.
- Tightly close joint on Panel 2 with counter wedge.
- Counter with pulling wedge on Panel 2. (Fig. 3)

Fig. 3

Standard Applications

Fillers, stopend formwork and panel width extensions units

Infill areas

VARIO GT 24 infill areas are shuttered using the Couplings VKZ 147 and VKZ 211.

Continuous infill area width with Couplings VKZ.

Coupling VKZ 147

Coupling VKZ 211

Stopend Formwork

VARIO offers 2 possibilities for realising stopend formwork: either the Coupling VKZ or Bulkhead Tie is used.

Coupling VKZ

perm. tension force 50 kN.

Bulkhead Tie

perm. tension force 30 kN.

Complete stopend formwork with bulkhead tie.

Panel width extensions

Panel width extensions are also realised using VARIO with system components.

Standard Applications

External corners, internal corners and shafts

Depending on the application, external and internal corners can be formed in various alternative ways.

- With VARIO Corner Panels
- With Cross Walers & Shaft Corners
- With Special Walers

VARIO Corner Panel

With this solution, especially for thin walls and low utilisation, the fillers consist of standard components.

External:

Panel w = 2.50 m

1 panel with extension.

Internal:

Corner Panel w = 1.25 / 0.50 m and

Panel w = 1.25 m with filler element.

Internal Corner

VARIO Internal Corner with filler element.

External Corner

Ensure that it is tightened when the correct angle is achieved. The continuous adjustment possibility facilitates this process.

The waler on the panel width extension unit must project 2 cm to enable firm pre-tensioning of the corner.

Details of the VARIO Corner

Shafts

In particular, small shafts can be realised extremely cost-effectively with customised Cross Walers and the quick-release Shaft Corner SSE.

Practical tip

The shaft corner should be stripped at the very latest one day after concreting.

Details of the Quick Release Corner

Small lift shaft with Cross Walers and Quick Release Corner SSE.

Standard Applications

Push-pull prop connector, crane lifting units

Push-Pull Prop Connector

Connecting the push-props and kickers to the VARIO panel is carried out using the Girder Headpiece or Wedge Headpiece. Fixing to the slab takes place using Base Plates and PERI Anchor Bolts 14/20 x 130.

The first panel must always be secured with 2 push-pull props.

Connecting to the GT 24 girder by means of the Girder Headpiece, Item no. 028050.

Connecting to Steel Waler SRZ with the Wedge Headpiece, Item no. 028060 and Wedge K, Item no. 024250.

Crane Lifting Unit

PERI VARIO offers three possibilities for lifting panels with the crane.

1. The Crane Splice 24

as easily assembled and dismantled lifting unit.

2. The Crane Lifting Eye 24, right / left

as permanently mounted lifting unit.

3. The Crane Lifting Unit 2 t / GT 24

for very heavy formwork units.

Important:

In general, two crane lifting units are used per moving unit. The Instructions for Use contain important information and must be followed at all times.

Instructions for Use
for the Crane Splice 24.

Customized,
ready-to-use
VARIO GT 24 element.

Instructions for Use
for the Crane Lifting
Unit 2t/GT 24.

Crane Splice 24

Permissible load-bearing capacity 700 kg
with a crane sling angle of max. 15°.

Crane Lifting Eye 24, right/left

Permissible load-bearing capacity 700 kg
with a crane sling angle of max. 15°.

Standard Applications

Working and Concreting Scaffold

Scaffold Bracket GB 80

The Scaffold Bracket GB 80 is used for the assembly of an 80 cm wide working scaffold. Scaffold components supplied by the contractor must comply with local valid safety regulations (for Germany DIN 4420). Timber components must conform at least to S10 or MS10 classification according to DIN 4074 as well as being clearly marked (BGR 169). Cross-section of guardrail boards: 3 cm x 15 cm. Secure planking and guardrails with nails or screws.

A correctly assembled concreting platform complete with PERI End Guardrail Frame 55, Item no. 065066.

PERI Scaffold Bracket GB 80,
perm. working load 1.5 kN/m²,
max. width of influence 1.25 m.

Several working platform levels are required at great heights.

Ready-to-use VARIO standard panel
h = 5.40 m with 2 concreting plat-
forms, ladder and push-pull props.

VARIO Platform System

**Pre-assembled concreting/working
platforms in different widths.
Complete with guardrails, end
hand-rail frame, push-pull prop connections
and crane eye. With or without access
hatch.**

Standard Applications

Panel extensions

Heights up to 8.00 m

The standard method of extension is to use the VARIO Extension Splice 24.

The flexurally stiff connection also automatically aligns the panels. The splice consists of only two components and is connected in no time with two quick action wingnuts.

Static values for the Extension Splice 24

$M_{perm.} = 1.73 \text{ kNm}$
 $Q_{perm.} = 0 \text{ kN}$
or
 $M_{perm.} = 0 \text{ kNm}$
 $Q_{perm.} = 5 \text{ kN}$

60 cm high timber extension simply realised with the Extension Splice 24.

Assembly of the Extension Splice 24 takes place through the lattice work of the GT 24 without having to drill the girders.

Extensions up to 5.00 m

4 x Extension Splices 24 for a 2.50 m element width.

Extensions up to 8.00 m

8 x Extension Splices 24 for a 2.50 m element width.

Technical drawing of a building facade showing vertical dimensions. The drawing includes a side elevation and a section view.

Side Elevation Dimensions:

- Total height: 3.85
- Top section height: 2.10
- Bottom section height: 1.75 (1.18 + 0.57)

Section View Dimensions:

- Total height: 9.80
- Top section height: 5.95
- Bottom section height: 3.85

The drawing also shows the building's structure, including columns and beams, and the location of the fire alarm control panel and fire alarm bell.

For more information on extensions, see PERI Design Tables or VARIO GT 24 assembly instructions.

Special Applications

Architectural concrete | Perfect concrete surfaces with VARIO

Achieving a first-class architectural concrete finish is primarily a question of selecting the most suitable formwork and formlining. Other factors such as the accuracy of the formwork assembly, shuttering work, concrete release agent, concrete and its placing all significantly influence the result. Through the free choice of girder lengths and spacings, tie positions and formlining, the VARIO GT 24 girder wall formwork offers the highest possible degree of flexibility for the realisation of architectural concrete structures.

Attractive looking concrete finish with rough vertical board finish.

43.50 m high tower with architectural concrete with a board finish for an industrial plant.

Exemplary fairfaced concrete with rough horizontal board finish.

Church steeple in Feldmoching near Munich. VARIO GT 24 on KGF 240 climbing formwork.

Consecration Hall, Neubiberg, Germany. VARIO with an orderly tie pattern. Formlining screwed on from the rear.

Perfect architectural concrete finish with horizontal and vertical panicular pattern.

Special Applications

Architectural concrete | Perfect concrete surfaces with VARIO

Due to the freely configurable waler and tie spacings, numerous possibilities for realising neat joint and tie arrangements can be executed.

An orderly pattern of ties spaced at 0.75 x 1.18 m and smooth, architectural concrete are the result (Secondary School in Kletov).

2.50 x 3.60 m panel

with tie spacings of 1.25 x 1.18 m.
2 ties horizontally, 3 ties vertically.

2.50 x 3.60 m panel

with tie spacings of 0.88 x 1.78 m.
3 ties horizontally, 2 ties vertically.

3.00 x 3.90 m panel

Architectural concrete with an orderly pattern of joints and tie spacings of 0.75 x 1.18 m. 4 ties horizontally, 3 ties vertically.

The rough surface finish ensures that the massive tunnel portals blend into the volcanic rock landscape. The unusual washboard structure was created by using extra battens on the formlining.

Portal of a tunnel structure on Hawaii, shuttered with VARIO GT 24 on KGF 240 climbing scaffold.

Forming boards provided by the contractor

High-quality architectural concrete with vertical board finish.

The panels were pre-assembled at PERI's Weissenhorn factory.

The BAB 4 motorway bridge over the Triebischbach valley was constructed with 49 m high circular piers featuring trumpet-shaped pier heads.

Special Applications

Bridge construction | VARIO on climbing scaffold and working platforms

Type-tested safety with KGF 240, KG 180 and CB 240, CB 160 systems.

The KGF 240 and CB 240 carriages allow the formwork to be moved 0.75 m on the platform without a crane. The formwork is moved together with the scaffold vertically in one crane lift. This saves time.

The KGF 240 and CB 240 provide a high level of safety due to the obstruction-free surface of the platform. The brackets are positioned below the platform which means there are no tripping hazards.

The platform lining can be pre-assembled and can be used immediately when moving from one site to the next. This results in considerable assembly time savings.

Special Applications

Water-retaining structures

Single-sided forming without formwork ties

When constructing locks, dams, cooling towers and walls requiring single-sided shuttering, VARIO GT 24 is frequently used with KG and CB, or SKS, climbing scaffold systems.

Magdeburg Waterway Intersection.
The intersection for three transport routes: rail – road – waterway. As part of this major transportation project, a number of key structures had to be realised. The photo shows the Rothensee lock facility. It was formed with VARIO GT 24 on KG climbing scaffold and single-sided SKS climbing scaffold.

system on KGF 240 climb-
ing scaffold.

Power station on the River Isar near the town of Plattling-Pielwachs. Pier formwork with VARIO GT 24 in combination with GRV circular formwork. The concrete surface was realised in the form of architectural concrete with a vertical board finish. PERI VARIO GT 24's versatility and easy adaptability makes it a particularly cost-effective shuttering system in this area.

Rear side of the weir pier.
The VARIO GT 24 could be
easily adapted to suit the
inclined rear wall require-
ments.

Special Applications

Water-retaining structures | Circular structures with VARIO

VARIO GT 24 – for shuttering circular structures

The VARIO articulated couplings connect the straight steel walers in a polygonal arrangement. It can be moved continuously to the right or to the left via the wedges. This results in a flush and neat panel joint.

In general, two design versions is standard.

Silo, h = 72 m, Ø = 20 m for power station in Oppeln, Poland. Shuttered with circular VARIO girder formwork on KGF climbing scaffold.

More information on PERI circular formwork: RUND-FLEX and GRV product brochures.

Version 1

Spacer timber inserted between GT 24 girders and SRZ steel walers.

The haunched transition to the ground slab was pre-assembled with the VARIO wall formwork panels to form a single unit for lifting.

Version 2

Segment profile timbers between the formlining and girders.

7.50 m high circular formwork with segment profile timbers on the GT 24 girders.

Special Applications

Single-sided walls | With VARIO and Brace Frame SB

For concreting against rock faces, existing walls or sheet piling, VARIO GT 24 with SB Brace Frames is used.

PERI brace frames

allow single-sided concreting up to a max. height of 8.75 m (see PERI Design Tables).

PERI Brace Frames SB-A0, A, B, C

are sized for loading on a lorry or in a container.

PERI brace frames

can be connected to all PERI wall formwork systems with standard system components.

Max. concreting height of 8.75 m, Brace Frame SB-A0, A, B and C with VARIO GT 24 wall formwork.

The PERI V-Tie Holder

For easy and accurate installation of anchors when using brace frames.

The V-Tie Holder and the Leading Anchor Coupler allow accurate assembly of the Tension Anchor under 45°.

Anchor system is easily fixed to the reinforcement with wire and pliers.

The advantages of the anchoring system with the Leading Anchor Coupler and V-Tie Holder are:

- less on-site material requirements
- no need to cut the tie rods to size
- tie rods are recoverable

The Leading Anchor Coupler is removed using the Single-Ended Spanner SW 70.

The tension forces arising at the brace frame's anchor point determine the choice of anchor system.

Example: DW 20 anchor system
Perm. tension force according to
DIN 18216 $2 \times 150 \text{ kN} = 300 \text{ kN}$.

When using PERI brace frames, the following must be taken into consideration:

1. The structural members (e.g. foundations or ground slabs) must be able to carry the tension and compression forces arising. Check the design of the members and position of the anchors when planning.
2. The "other side" of the single-sided formwork (existing walls, planking, rocks etc.) must obviously be able to withstand the fresh concrete pressure acting upon it.
3. DW tie rods installed for anchoring purposes must not be welded or bent. We recommend the use of PERI V-Tie Holders.

The following connecting parts are required for connecting VARIO GT 24 to Brace Frames SB-A0, A, B and C:

Waler Connector

100813	4.980
--------	-------

VARIO GT 24 Girder Wall Formwork

Item no.	Weight kg
105986	155.000

Platform VARIO 100 x 250 without Hatch
Pre-assembled working platform for VARIO GT 24 panels.

Complete with
2 pc. 100813 Platform Guardrail 80
Technical Data
Permissible load 150 kg/m².

102920	115.000
103203	84.900

Platforms VARIO without Hatch
Platform VARIO 100 x 187.5
Platform VARIO 100 x 100
Pre-assembled working platform for VARIO GT 24 panels.

Technical Data
Permissible load 150 kg/m².

100813	4.980
--------	-------

Accessories
Platform Guardrail 80

103932	36.300
--------	--------

End Platform VARIO
Pre-assembled working platform for VARIO GT 24 stopend formwork. 2 pieces per set of stopend formwork and platform level.

Technical Data
Permissible load 150 kg/m².

103865	22.000
--------	--------

Accessories
Guardrail for End Platform VARIO

Item no.	Weight kg
103992	65.600

External Corner Platform VARIO
Pre-assembled working platform for VARIO GT 24 panels. Connecting platform with pivot-mounted end handrail. For external corners from 80° to 100°.

Technical Data
Permissible load 150 kg/m².

103865	22.000
--------	--------

Guardrail for End Platform VARIO
For assembly on VARIO End Platform with wall thicknesses up to 0.50 m. With foldable VARIO Platform Handrail 80.

100813	4.980
--------	-------

Platform Guardrail 80
End handrail for various platforms. Pivot-mounted.

Complete with
2 pc. 102414 Bolt Ø 12 x 105 x 5 x 95-ST, galv.
2 pc. 018060 Cotter Pin 4/1, galv.

VARIO GT 24 Girder Wall Formwork

Item no.	Weight kg
100541	4.020

Connector for Platform VARIO

For connecting the VARIO platforms and platform struts to GT 24 girders.

Complete with

1 pc. 027170 Pin Ø 16 x 42, galv.
1 pc. 018060 Cotter Pin 4/1, galv.

101273	7.780
101269	11.200

Platform Struts VARIO

Platform Strut VARIO 167

Platform Strut VARIO 246

For assembling VARIO platforms. 2 pieces per platform.

Complete with

2 pc. 018050 Pin Ø 16 x 65/86, galv.
2 pc. 018060 Cotter Pin 4/1, galv.

105480	16.600
105484	16.600

Platform Beams VARIO

Platform Beam VARIO, left

Platform Beam VARIO, right

For assembling VARIO GT 24 filler platforms with bolted boarding.

Note

Illustration shows the VARIO Platform Beam, left.

VARIO GT 24 Girder Wall Formwork

Item no.	Weight kg
105823	9.310

Platform Bracket VARIO VBK 90
For assembly of a working and concreting scaffold on elements with GT 24 girders. With safety pins and cotter pins.

Complete with
1 pc. 106336 Bolt Ø 20 x 120, galv.
1 pc. 018060 Cotter Pin 4/1, galv.
Technical Data
Permissible load 150 kg/m² with a maximum width of influence 1.25 m.

116292	4.730
--------	-------

Accessories
Guardrail Post HSGP-2

107738	24.100
--------	--------

Ladder 240 – 360
Adjustable from 2.40 m to 3.60 m.

111165	6.080
--------	-------

Ladder Connector VARIO, adjustable
For connecting ladders to Steel Walers SRZ and SRU, Profile U100 – U120.

Complete with
2 pc. 710266 Bolt ISO 4017 M12 x 25-8.8, galv.
2 pc. 701763 Clamping Plate FI 25 x 10 x 90

Item no.	Weight kg		
028050	4.550	Girder Headpiece GT 24, galv. For connecting push-pull props and kicker braces to GT 24 Girders	Complete with 1 pc. 027170 Pin Ø 16 x 42, galv. 1 pc. 018060 Cotter Pin 4/1, galv.
			
028070	4.680	Girder Headpiece GT 24/A, galv. For connecting push-pull props and kicker braces to extended GT 24 Girders in the area of the Extension Splice 24-2.	Complete with 1 pc. 027170 Pin Ø 16 x 42, galv. 1 pc. 018060 Cotter Pin 4/1, galv.
			
028060	1.940	Wedge Headpiece SRZ/SRU For connecting push-pull props and kicker braces to Steel Waler SRZ and SRU Profile U100 – U140.	Complete with 1 pc. 027170 Pin Ø 16 x 42, galv. 1 pc. 018060 Cotter Pin 4/1, galv.
			
024250	0.331	Accessories Wedge K, galv.	
117466	10.600	Push-Pull Prop RS 210, galv. Extension length l = 1.30 – 2.10 m. For aligning PERI formwork systems and precast concrete elements.	Note Permissible load see PERI Design Tables.
			

VARIO GT 24 Girder Wall Formwork

Item no.	Weight kg
118238	12.200

Push-Pull Prop RS 260, galv.
Extension length $l = 2.30 - 2.60$ m.
For aligning PERI formwork systems and precast concrete elements.

Note
Permissible load see PERI Design Tables.

117467	15.500
--------	--------

Push-Pull Prop RS 300, galv.
Extension length $l = 1.90 - 3.00$ m.
For aligning PERI formwork systems and precast concrete elements.

Note
Permissible load see PERI Design Tables.

117468	23.000
--------	--------

Push-Pull Prop RS 450, galv.
Extension length $l = 2.80 - 4.50$ m.
For aligning PERI formwork systems and precast concrete elements.

Note
Permissible load see PERI Design Tables.

117469	40.000
--------	--------

Push-Pull Prop RS 650, galv.
Extension length $l = 4.30 - 6.50$ m.
For aligning PERI formwork systems and precast concrete elements.

Note
Permissible load see PERI Design Tables.

VARIO GT 24 Girder Wall Formwork

Item no.	Weight kg
028990	115.000

Push-Pull Prop RS 1000, galv.
Extension length $l = 6.40 - 10.00$ m.
For aligning PERI formwork systems.

Note

Permissible load see PERI Design Tables.

103800	271.000
--------	---------

Push-Pull Prop RS 1400, galv.
Extension length $l = 6.40 - 14.00$ m.
For aligning PERI formwork systems.

Note

Permissible load see PERI Design Tables.
Chain can be operated from bottom.

117343	3.250
--------	-------

Base Plate-2 for RS 210 – 1400, galv.
For assembly of Push-Pull Props RS 210, 260, 300, 450, 650, 1000 and 1400.

Complete with

2 pc. 105400 Pin Ø 20 x 140, galv.
2 pc. 018060 Cotter Pin 4/1, galv.

Accessories

124777	0.210
--------	-------

Anchor Bolt PERI 14/20 x 130

Item no.	Weight kg
126666	3.070

Base Plate-3 for RS 210 - 1400
For assembly of Push-Pull Props RS 210, 260, 300, 450, 650, 1000 and 1400.

Complete with
2 pc. 105400 Pin Ø 20 x 140, galv.
2 pc. 018060 Cotter Pin 4/1, galv.
1 pc. 113063 Bolt ISO 4014 M12 x 80-8.8, galv.
1 pc. 113064 Hex Nut ISO7042-M12-8-G, galv.

124777	0.210
--------	-------

Accessories
Anchor Bolt PERI 14/20 x 130

028010	17.900
--------	--------

Push-Pull Prop RSS I
Extension length l = 2.05 – 2.94 m.
For aligning PERI formwork systems.

Note
Permissible load see PERI Design Tables.

113397	1.600
--------	-------

Spindle Handle RSS / AV
Spindle Handle for screwing on Push-Pull-Props RSS I, RSS II, RSS III and Kickers AV 210 and AV 190 complete with 2 bolts and nuts M8.

028020	22.000
--------	--------

Push-Pull Prop RSS II
Extension length l = 2.91 – 3.80 m.
For aligning PERI formwork systems.

Note
Permissible load see PERI Design Tables.

Item no.	Weight kg
028030	38.400

Push-Pull Prop RSS III

Extension length $l = 4.60 - 6.00$ m.
For aligning PERI formwork systems.

Note

Permissible load see PERI Design Tables.

106000	1.820
--------	-------

Base Plate-2 for RSS, galv.

For assembly of RSS Push-Pull Props.

Complete with

1 pc. 027170 Pin Ø 16 x 42, galv.
1 pc. 018060 Cotter Pin 4/1, galv.

124777	0.210

Kickers AV

Kicker AV 82

Kicker AV 111

For aligning PERI formwork systems.

min. L max. L

500	820
790	1110

Complete with

1 pc. 027170 Pin Ø 16 x 42, galv.
1 pc. 018060 Cotter Pin 4/1, galv.

Note

Permissible load see PERI Design Tables.

VARIO GT 24 Girder Wall Formwork

Item no.	Weight kg
028110	5.180

Kicker AV 140
Extension length l = 1.08 – 1.40 m.
For aligning PERI formwork systems.

Complete with
1 pc. 027170 Pin Ø 16 x 42, galv.
1 pc. 018060 Cotter Pin 4/1, galv.
Note
Permissible load see PERI Design Tables.

028120	17.000
--------	--------

Kicker AV RSS III
Extension length l = 2.03 – 2.92 m.
For aligning PERI formwork systems.

Complete with
1 pc. 027170 Pin Ø 16 x 42, galv.
1 pc. 018060 Cotter Pin 4/1, galv.
Note
Permissible load see PERI Design Tables.

108135	12.900
--------	--------

Kicker AV 210
Extension length l = 1.28 – 2.10 m.
For aligning PERI formwork systems.

Complete with
1 pc. 027170 Pin Ø 16 x 42, galv.
1 pc. 018060 Cotter Pin 4/1, galv.
Note
Permissible load see PERI Design Tables.

Item no.	Weight kg
124777	0.210

Anchor Bolt PERI 14/20 x 130

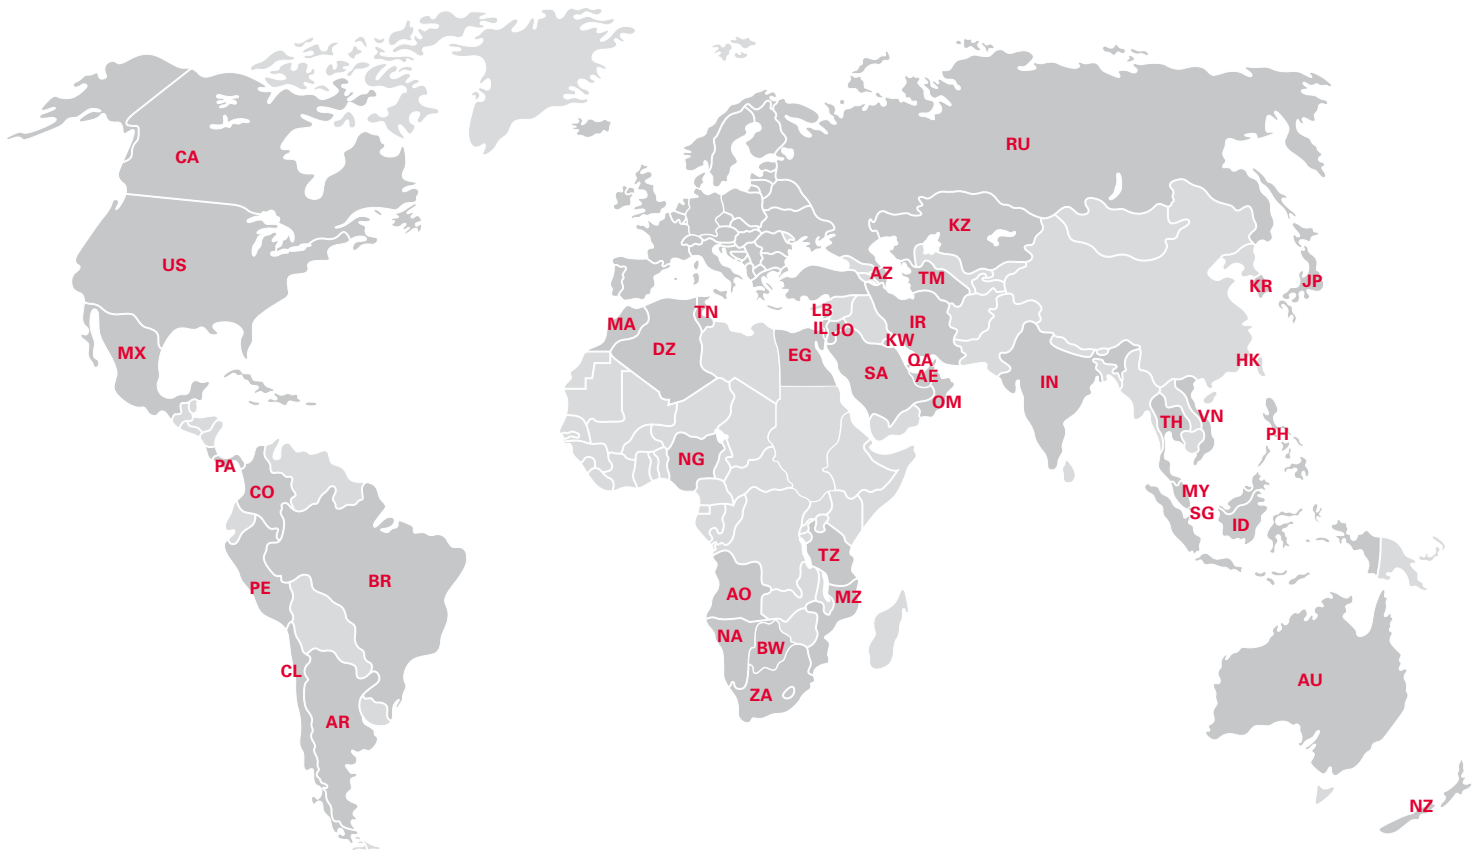

For temporary fixation to reinforced concrete structures.

Note

See PERI data sheet!
Drilling Ø 14 mm.
